Financial sales analysis: strategic brief

Five countries, September 2013 to December 2014 | Brandy Sango

Purpose

Present sixteen months of sales and profit clearly enough that anyone can follow it, and publish the work as a portfolio project. The source is a sample financial data set of 700 transactions. The report answers the course questions and then tells one connected story.

Audience

A general audience with no data background, such as a hiring panel, colleagues or a LinkedIn reader. Slides carry one big number and one short headline. Detail and wording for the speaker are in the notes.

The one message

The business is healthy but leaks margin. Government earns two thirds of the profit, Enterprise loses money, and deep discounts are how it loses it.

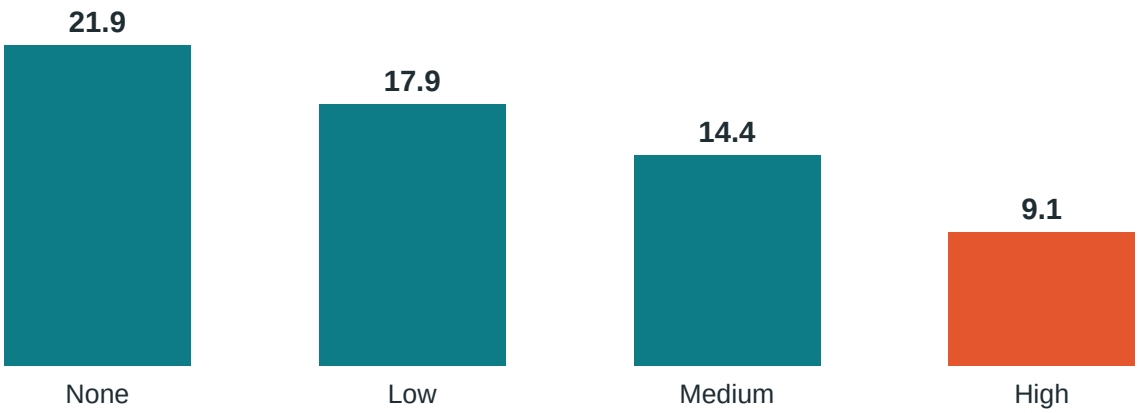
$118.7M	$16.9M	14.2%	1.13M
sales	profit	margin	units sold

What the audience should do afterwards

Fix the Enterprise discounts first, protect Government pricing and service, and stock up for October and December. None of these needs new customers.

Storyline

The deck follows the report page by page, so each claim can be found and checked.

1	**Title**	Cover
2	**Where does the money stay? $118.7M in sales, 14 cents in profit**	Report page 1
3	**700 transactions, 16 months, 2013 has only four**	Report page 1
4	**The Executive Overview: $16.9M profit, 14.2% margin**	Report page 2
5	**The US sells most but keeps least: 12.0% margin**	Report page 3
6	**Paseo earns 28% of profit**	Report page 4
7	**Government is 67% of profit; Enterprise loses $0.6M**	Report page 5
8	**Margin falls from 21.9% to 9.1% as discounts deepen; 58 loss-making sales**	Report page 5
9	**October 2014 and December 2014 are the peaks**	Report page 6
10	**Five recommendations**	Report pages 7, 8
11	**Conclusion and limits**	Report pages 7, 8


Profit margin by discount level, %
